

# Pathways Presentation Notes

## Goals for group (and optionally, personal goals)

Put discussed goals from Week 14 lab in this section. If your group has out of class/lab goals (e.g. completing a set of slides, meeting to discuss slides, meeting to practice presentation), I encourage putting the agreed upon deadline/meeting times here as well, to make sure all group members know those dates.

Put goals here:

## Outline of Presentation

As you discuss items needed for the presentation and how to organize your talk, write your ideas here - organize them before the end of the lab into an outline of your talk (preferably have completed this within the first hour of Week 14's lab). I'm not comparing this to your final talk - I am only checking you all have spent some time generating ideas and organizing your thoughts.

**Some things you can include to have the presentation outline be more helpful:** indicate who is generating draft for which slide(s), who will be second pair of eyes for revision, list of content to include, useful links, ideas for visuals, etc.

Start outline here:
